EDUCATION

JAIN UNIERSITY

- **Master of Computer Application**
Elective - Full Stack Developer
2022-2024

SKILLS

- Front-End: HTML, CSS, React, Redux Toolkit, Tailwind CSS, Bootstrap ,Next.js
- Back-End: Node.js, Express.js
- Database: MongoDB
- Languages: JavaScript

CERTIFICATIONS

- Data Visualization using Power BI
- Digital Marketing,
- Blockchain,
- internet of things ,
- Artificial Intelligence
from Jain university

PROFILE SUMMARY

I am a fresher full-stack developer with a Master of Computer Applications (MCA) from Jain University. I specialize in both front-end and back-end technologies, utilizing modern frameworks and libraries to create robust, scalable, and efficient applications.

PROJECTS

Full Stack projects

1. Background Removal Tool LINK: BG-Removal

Technologies: React JS, MongoDB, Express JS, Node JS, Razorpay

- Integrated AI-powered background removal functionality allowing users to upload images and process them for transparent backgrounds.
- Built a credit-based system for processing images, enabling users to purchase credits via an integrated online payment gateway.
- Implemented user authentication and management using Clerk, including seamless integration of pre-built components like Login, Registration, and Profile forms.
- Designed and deployed scalable and efficient backend APIs for handling image uploads, processing, and credit management.
- Focused on delivering a robust and user-friendly experience with cutting-edge AI technology.

2 E-commerce clothing project LINK: Forever

Technologies: React JS, MongoDB, Express JS, Node JS, Stripe , Razorpay

- Built and deployed a full-stack e-commerce website using the MERN stack(MongoDB, Express.js, React.js, Node.js) with deployment on Vercel.
- Implemented features including product browsing, filtering, sorting, and adding products to the cart with variant selection (e.g., size).
- Developed a robust order placement system, supporting Cash on Delivery (COD)and online payment methods using Stripe and Razorpay payment gateways.
- Created a fully functional admin dashboard for product management (add, update, delete) and order tracking.
- Designed and developed RESTful APIs for user authentication, product handling, and order processing, with data stored in MongoDB.

Frontend Project:- Travel Website LINK: Trips and Travel

Technologies: HTML, CSS, JavaScript, Bootstrap
